

## ArcGIS Online Tools for the Waldo Canyon Fire Information Map

### Base Map Tools

- **Show Details of Map**  Button toggles the Table of Contents including its Tools on and off
- **Table of Contents Tools**
  - **About This Map**  Button – Shows when it was modified
  - **Show Contents of Map**  Button- Allows you to turn layers On and Off
  - **Show Map Legend**  Button- Click this to show the Legend which explains what each symbol means
- **Add Content to Map**  Button- to add data such as a shapefile, GPS data file, or comma delimited text file
- **Basemap Gallery**  Button- to change what the basemap (imagery or streets) is being used

### Session Tools

- **Save Map**  Button- allows you to save your map changes during this session to your ArcGIS Online account (an account is needed to use this feature)
- **Share Map**  Button- allows you to copy a link to the map or share via Facebook or Twitter
- **Open Map Page to Print**  Button- The map does not print with the Basemap. This is a feature created by Esri and the lack of a basemap is a limitation.
- **Measure Area and Distance**  Button- This button activates the Measure Area, Measure Distance, and Location Buttons
- **Bookmarks**  Button- Allows you to bookmark or remember a location on the map
- **The Search**  box- Allows you to enter an address and have it zoomed into and marked on the map
