 STORMWATER
 MANAGEMENT
 PLANS**

**Tuesday
 October 25, 2016
 8:00am to 5:00pm**

Course Description

The development and implementation of Stormwater Management Plans (SWMP) requires a carefully planned approach accompanied by close follow up.

This training program is designed to provide information about how to prepare and implement these plans to help comply with the requirements of the CDPS permit as issued by the Colorado Department of Public Health and Environment (CDPHE), Water Quality Control Division (WQCD). This program is designed and intended to provide support, training and guidance for the SWMP Administrator.

Who should go?

This class is intended for those developing, implementing and updating Stormwater Management Plans (SWMPs) that are required by the CDPHE. There is no formal prerequisite for this class. However, it is strongly recommended that participants have knowledge of the construction stormwater permit and best management practices to control erosion and sedimentation during construction activities.

LEARNING OBJECTIVES

UPON COMPLETION OF THE PROGRAM, PARTICIPANTS WILL BE ABLE TO:

- DESCRIBE THE CONTENTS OF A SWMP
- SELECT BEST MANAGEMENT PRACTICES (BMPS) FOR THE CONTROL OF EROSION AND SEDIMENTATION
- DESCRIBE THE REQUIREMENTS FOR AMENDMENTS TO THE SWMP
- DESCRIBE THE PROCEDURES FOR DEVELOPMENT, REVISION AND IMPLEMENTATION OF THE SWMP

Developing and Implementing Stormwater Management Plans

Presented by Tom Gore from
Altitude Training Associates

When: Tuesday October 25, 2016

(8:00am-5:00 pm) 7:30 am check-in
